

WINTIDE

10g/kg nosiheptide

ACTIVE CONSTITUENT	10g/kg nosiheptide
ADVANTAGES	WINTIDE is highly effective against a wide range of gram bacteria and a select range negative bacteria. WINTIDE is highly effective in controlling neocrotic enteritis caused by Clostridium perfringens. WINTIDE consistently and reliably increases rate of weight gain and improves the efficiency of feed utilisation.
MODE OF ACTION	WINTIDE contains nosiphetide, a thiopeptide antibiotic that inhibits the protein synthesis of target bacteria. Nosiphetide is non - toxic , is not absorbed by the GIT and has limited cross resistance with other antibiotics.
INDICATIONS	Poultry For the control of neocrotic enteritis (caused by Clostridium perfringens. Types A and C) and as an aid in the prevention of neocrotic enteritis in the prevention of neocrotic enteritis in broilers and replacement layers.
USAGE	Poultry Prevention: Pre Starter/ Starter - 0.200 - 0.0250kg/tonne of finished feed (2 - 2.5mg/kg nosiphetide) Grower / Finisher/ Prelayer - 0.200kg/tonne of finished feed (2 mg/kg nosiphetide) Treatment: 0.300 kg/tonne of finished feed (3mg/kg nosiphetide) for 7 days.
PACKAGING	25kg bags. Polyethylene bag to ensure product stability. Store in a cool dry place with adequate ventilation
PRECAUTIONS	Withdrawal Period : 7 days Do not feed birds which are producing eggs or egg products for human consumption. Shelf Life of 24 Number are indicated on packaging. Expiration Date and Batch Number are indicated on packaging.

Suite No 19-15, Level 19, Centro Mall, No. 8,
Jalan Batu Tiga Lama, 41300 Klang, Selangor.

KSS Life Sciences delivers innovative, research-based solutions to improve the health, well – being and productivity of food producing animals.
