

MAXAVAIL

100g/kg avilamycin

ACTIVE CONSTITUENT

100g/kg avilamycin

ADVANTAGES

MAXAVAIL is a high potency feed additive used as an aid in the prevention of *Clostridium perfringens* and for increased rate of weight and improved feed efficiency in broiler chickens.

MAXAVAIL has synergistic benefits when used in conjunction with a well-balanced coccidiostat program.

MODE OF ACTION

MAXAVAIL inhibits bacterial protein synthesis which controls the growth and maturation of *Clostridium* spp. And other gram - positive bacteria.

INDICATIONS

For the prevention and control of Necrotic Enteritis in broiler chickens caused by *Clostridium perfringens*.

For increased rate of weight gain and improved feed efficiency in broiler chickens.

USAGE

Recommended Inclusion level:

Increased weight Gain and Improved Feed Efficiency:

Mix 50 - 100g per ton of finished feed (5 - 10ppm avilamycin)

Aid in the Prevention of Necrotic Enteritis:

Mix 100 - 150g per ton of finished feed (10 - 15ppm avilamycin)

PACKAGING

10 kg bags. Multilayered polyethylene bag to ensure product stability in humid climates.

Store in a cool dry place with adequate ventilation.

PRECAUTIONS

Withholding Periods

Meat: Zero (0) days

EGGS: DO NOT USE in birds which are producing or may in the future produce eggs or egg products for human consumption.

Shelf Life of 24 Number are indicated on packaging.

Suite No 19-15, Level 19, Centro Mall, No. 8,
Jalan Batu Tiga Lama, 41300 Klang, Selangor.

KSS Life Sciences delivers innovative, research-based solutions to improve the health, well-being and productivity of food producing animals.
